Oz Ezra Cohen

•0535249608 •Ashkelon • oznabi9@gmail.com

A software tester with knowledge of employee management and knowledge of AutoCAD software thanks to his studies as a landscape architecture engineer

Properly understands the testing world, both theoretical and practical, including writing **STP**, **STD**, **STR** documents, example of a mobile project I did on the Israel Post application:Mobile Project

My way of life is based on the saying: "**Ben Azzai said, in your name they will call you, and in your place they will lie down, and in your place they will give you" {Yuma 68:}**

:Education and professional courses

- **Landscape Architecture Engineer -** Ashkelon College **-2021-2023**
- **QA course and start of automation studies -** Automation College **-2024**

 Automation college

And here is the certificate: QA course completion certificate

As part of the training, I acquired knowledge and practical experience in the following subjects

- Building test scripts including detailed writing of **STD, STP, STR** and including writing a document **STR** on the Israel Post application:Mobile project
- Running tests on several products and applications like **Mobile(Android)** and on **browsers: Chrome** And **Firefox**
- I learned how to report bugs in **Jira** professionally and **reported as-75 bags** in that system
- Understanding and experience working with: **CSS**, **HTML** including writing a personal website, see link: Personal website

- A thorough understanding of the testing world, including a thorough understanding of work processes **(Agile)** and practical experience with the various types of tests Sanity, End2End, Load, Regression, UI, Recovery
- **Good knowledge of the SQL language up to the level of using the Join option**
- Very good knowledge of working with: **Selenium**
- Good knowledge in using **TestNG**
- Good use working with **Jenkins**

Work experience:

2024- Supervision of gardening contractors in Ashkelon municipality

- As part of the position, I was responsible for the work output of the workers and the quality of their work, which required **strictness** and **meticulousness** in order to avoid wasting time and avoid poor quality of work
- Managing the employees according to the priorities of the various events in the city and meeting the "deadline" of finishing the work, this need gave me the skills: **dealing with stressful situations and managing the employees**
- Responding to several parties at the same time (managers, team leaders, senior officials in the municipality, etc.) **This need gave me the ability to work with several parties at the same time**

Environments and tools:

- **Browsers: Chrome, Firefox, Edge**
- **Softwars**: good knowledge in: **Eclipse** and **AutoCAD,** Basic knowledge in **Postman**
- **Operating systems:** Windows(All) , (Mobile(Android
- **Managing bugs and testing:** Jira **,** basic knowledge in: **TestRail**
- **Code and programming languages:** SQL ,HTML,CSS,JAVA** good knowledge in,
- **API Rest** :basic knowledge in
- **Test methodologies: Waterfall** and **Agile**
- **Bug docs: STP,STD,STR**
- Good knowledge and understanding of the working method of **POM**
- Good knowledge of working with libraries of **TestNG**
- Very good knowledge in the use of **Selenium**

Good using in **Jenkins**   •

Military service:

2017-2019 : Full service in the logistics corps of IDF as a food supplier

Languages: **Hebrew:** native level, **English:** good level

Skills

Love and good with working in a team   .1

Loves learning new things   .2

I has the ability to learn quickly   .3
